

## **Flight planning and Online filing**

*Date published: 18 January, 2011*

---

RocketRoute solves a real problem in today's aviation market by helping pilots to prepare and file IFR as well as VFR flight plans in minutes, instead of hours.

The service is easy to use, fast and convenient. RocketRoute works throughout Europe and can be accessed by web or mobile phone.

The company was founded in February 2010 and is based in Guildford, Surrey, UK.

*GreekHelicopters.gr team is, at this time, testing the system for Greece. It looks great and does what it says. We encourage all our members to try it and send us comments. The service is totally free for 30 days. It is fully compatible on all platforms as well as on iPhone and iPad. The flight plans are distributed through Eurocontrol.*
